LETTER OF TRANSMITTAL.

TREASURY DEPARTMENT, BUREAU OF STATISTICS,
Washington, D. C., January 15, 1895.

SIR: I have the honor to transmit herewith, in accordance with the requirements of section 336 of the Revised Statutes, complete statements of the foreign commerce and navigation of the United States for the year ending June 30, 1894, compiled from the official returns of collectors of customs. The labor of compiling and obtaining the final results is completed at such a late day as to make almost impossible an intelligent and well-considered analysis of the movement of the commerce of the year in time to be submitted to Congress on December first. I have, therefore, omitted the usual résumé and devoted my energies to still further modifications of form and arrangement. These changes have been so radical as to have taxed to its utmost the capacity of this Bureau, as an apparently slight change must be carried through all the books of the office and the returns made by collectors. I can not praise too highly the manner in which the force of this Bureau has succeeded in carrying out my wishes. The difficulties already overcome point out many new difficulties yet to be met, and the lack of an adequate force must be an ever-increasing embarrassment to developing the proper functions of the Bureau.

Respectfully, yours,

Worthington C. Ford

Chief of Bureau.

Hon. JOHN G. CARLISLE, *Secretary of the Treasury.*

EXPLANATION OF TABLES, AND CLASSIFICATION OF DISTRICTS, AND OF COUNTRIES.

GENERAL IMPORTS AND IMPORTS ENTERED FOR CONSUMPTION.

The statements of *general imports*, Table No. 3, embrace imported articles entered at the custom-houses for immediate consumption and imported articles entered for warehouse. The statements of *imports entered for consumption*, Tables Nos. 10 to 15, embrace imported articles entered for immediate consumption and imported articles withdrawn from warehouse for consumption. The statement of *general imports* and the statement of *imports entered for consumption* for any period will always differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "entry for consumption" is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion. Portions of these goods may be subsequently exported.

1. The values of prices of articles imported since August 1, 1890, are governed by the provisions of section 19 of the act of June 10, 1890, which prescribes that the values of imported merchandise subject to ad valorem rates of duty, and duty imposed upon and regulated in any manner by the value thereof, shall be "the actual market value or wholesale price of such merchandise as bought and sold in usual wholesale quantities, at the time of exportation to the United States, in the principal markets of the country from whence imported, and in the condition in which such merchandise is there bought and sold for exportation to the United States, or consigned to the United States for sale, including the value of all cartons, cases, crates, boxes, sacks, and coverings of any kind, and all other costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States."

2. *Domestic export values*.—Table No. 4, inclusive, exhibit the exports of articles of domestic product or manufacture, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles and utensils made from imported metals, etc. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

3. *Foreign export values*.—Table No. 5, sometimes called "foreign exports" or "reexports," exhibit exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is the value which they bore in the foreign markets whence they were imported into the United States; in other words, their import value. The value of such commodities exported "not from warehouse" (that is, goods not under bond), comprising free goods mainly, is the value at the ports of the United States whence they are exported.

4. *Values of foreign merchandise in transit or transshipped*.—Table No. 7 exhibits foreign merchandise brought to the United States for immediate transit across the territory of the United States to a foreign country, or for transshipment in the ports of the United States to a foreign country. The value of the commodities returned in this table is similar to that of imports.

5. *Value of warehoused merchandise*.—Table No. 9 exhibits warehoused imported merchandise. This merchandise has already appeared in the statement of *general imports*, Table No. 3, for the year during which it was imported. The official values of the articles therein represented are the same as the *import values* above described.

TONNAGE TABLES.

6. In the tables of tonnage movement, Nos. 16, 17, and 18, the tonnage is stated in net tons.

PASSENGERS DEPARTED.

No. 13.—STATEMENT OF THE NUMBER OF PASSENGERS DEPARTED FROM SEAPORTS OF THE UNITED STATES FOR FOREIGN COUNTRIES, OTHER THAN BRITISH NORTH AMERICA, DURING THE YEAR ENDING JUNE 30, 1894.

[In the absence of law requiring masters of vessels departing from the United States for foreign countries to deliver to collectors of customs returns of the passengers embarking on such vessels, reliance is had upon the courtesy of the agents of steamship and packet lines for information on the outward passenger movement. The following statistics relate only to the departure from the seaports indicated in the table, and comprise only the data secured in the manner above indicated, but it is probable that the departures given embrace nearly the entire passenger movement from the United States to foreign countries from our seaports.]
